Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/524,587	Applicant(s) SERNA ET AL.	
	Examiner Pablo N. Tran	Art Unit 2618	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-10 and 15 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Regarding claims 1 and 15, new subject matter, “wherein the data packet includes a unicast destination address corresponding to a mobile node; wherein the link-layer frame includes a broadcast address and the unicast destination address”, was not disclosed in the specification, as originally filed. Claims 2-10 are dependent claims.

Regarding claim 7, new subject matter, “the unicast destination address is a network layer address”, was not disclosed in the specification, as originally filed.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2618

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

4. Claims 1-6, 8-9, and 15 are rejected under 35 U.S.C. 102(a) as being anticipated by Applicant Admitted Prior Art (hereinafter "AAPA").

As per claims 1 and 15, AAPA disclosed a method of forwarding a data packet wherein receiving the data packet wherein the data packet includes a destination address (fig. 4/no. 61), generating a link-layer frame includes a broadcast address (fig. 4/no. 61) and the link-layer destination address (fig. 4/no. 71) of the mobile node, and sending via the broadcast address the link-layer frame to a plurality of access devices wherein at least one access device supports the mobile node (fig. 4, paragraph 0002-0009).

As per claim 2, AAPA disclosed wherein said broadcast address is predefined (paragraph 0002-0009).

As per claim 3, AAPA disclosed determining that the at least one access device supports the mobile node and forwarding the link-layer frame to the mobile node (paragraph 0002-0009).

As per claim 4, AAPA disclosed wherein said data packet is an IP data Packet (paragraph 0002-0009).

As per claim 5, AAPA disclosed wherein said broadcast address is a link-layer address (paragraph 0002-0009).

As per claim 6, AAPA disclosed wherein said plurality of access devices store mappings between supported destination addresses and link-layer addresses corresponding to the supported destination address (fig. 4, paragraph 0002-0009).

As per claim 8, AAPA disclosed wherein the data packet further comprises a payload and the payload is included in the link-layer frame (fig. 4, paragraph 0002-00092).

As per claim 9, AAPA disclosed of encapsulating said data packet into a link-layer frame (fig. 4, paragraph 0002-0009).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant Admitted Prior Art (hereinafter "AAPA") and in view of Choyi et al. (US Pat No 7,339,928).

As per claim 10, AAPA is silent about discarding the packet if the access device does not support the mobile node. However, Choyi disclose such teaching (col. 14/ln. 49-col. 15/ln. 30). Therefore, it would have been obvious to one of ordinary skill in the art at the time of invention for AAPA to utilize such teaching, as taught by Choyi, in order to save bandwidth.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Pablo Tran whose telephone number is (571)272-7898.
